# ACID Pro

## Professional Digital Audio Workstation

Fast and intuitive, ACID™ Pro 7 is a real creative partner. Blend multitrack recording, audio editing and mixing, MIDI recording and sequencing, and state of the art loop-based music production in a seamless environment tailored to your unique creative process. ACID Pro 7 delivers maximum performance at every level, with high-resolution multitrack audio recording, deep MIDI programming capabilities, and of course the distinctive real-time pitch and tempo controls that place ACID software in a class by itself. Produce any type of music in ACID Pro 7 and transform your ideas into real results.

### Powerful digital audio workstation environment

- Combine audio recording, MIDI composition, and loop-based music creation
- Mix on a customizable console with flexible routing architecture
- Output to ASIO-compatible devices for maximum hardware integration

### Comprehensive MIDI support

- Record, edit, and filter note and controller data
- Address virtual instruments and record/edit/automate controller data
- Freeze MIDI tracks to save CPU processing power

### Mixing and editing

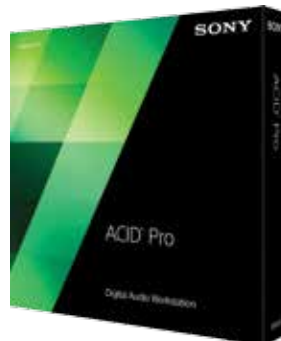

- Real-time pitch and tempo matching, shifting, and scaling
- Groove Mapping and Groove Cloning quantization tools
- Beatmapper™ tool automatically synchs tracks on the timeline
- Chopper tool performs advanced sample manipulation

### Professional effects and soft synth support

- Native VST and VSTi plug-in and instrument support
- Includes a wide variety of signal and effects processing tools
- ASIO and ReWire support for software and hardware integration

### Streamlined, efficient workflow

- Create arrangements using folder tracks and section editing tools
- Configure the workspace to suit any style
- Burn audio CDs

### CORE FEATURES

- A DAW powerhouse
- Record multitrack high-resolution audio
- The ultimate loop-based music creation tool
